Skills targeted General learning objectives	This module pursues the objectives of the module <i>Typography I</i>. This module enables students to acquire skills allowing them to identify and assess the codes affecting how typographic projects are conducted. The acquisition process is based on aesthetic, technical, historical, cultural, societal and cognitive elements, as well as on a comprehensive approach to type design culture and the history of writing in general.		
Teaching content and form	The module consists of two workshops : a) Optical size: creation of types adapted to the supports and the size of their reproduction. b) Editorial Design: layout of the types designed in the other workshops, creation of specimens on paper or screen, use of typographic material, editorial design. Under the name Type lectures, talks are also offered by regular professors and guests, on historical and technical aspects of type and graphic design. Orthotypography and layout rules are also part of a course entitled Microtypography. Tours of archival institutions, meetings with students and lecturers of other majors in the ECAL MA of Design and the involvement, from time to time, of professionals presenting their work, are also on the agenda for this module.		
Forms of assessment and validation	At the end of the semester, the works produced in the workshops are evaluated by a jury made up of the professors from the MA Type Design program. The lectures and other elements in this module are not subject to grading. The assessment may take students' regular attendance at classes and lectures into account. To obtain credits, students must obtain an average mark of at least 4.		
Remedial teaching	Remediation is possible by working to make good observed shortfalls. Module repeated in the academic year following a fail mark, according to procedures to be agreed with the director of the module. No remediation possible after repeating the module.
